DETAILED ACTION

Request for Reconsideration

1. Applicant's submittal of a request for reconsideration was entered on 3/14/05 wherein claims 1-24 are pending.

Claim Rejections - 35 USC § 103

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. Claims 1-6, 10-13, and 15-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent No. 5,057,677 (Bertagna et al.) in view of U.S. Patent No. 4,913,341 (Bachman)

In regards to independent **claim 1**, Bertagna et al. discloses a system for controlling currency exchange and merchandise sales on an aircraft with a passenger load, which comprises: a service cart (36); a currency inventory (see column 3, lines 60-61; cash receipts) including at least two different currencies; an inventory of merchandise (see column 3, lines 60-61) stowed in the service cart; the service cart (36) being stowable on the aircraft and movable through the cabin thereof (see column 5, lines 24-28); a point-of-sale computer (28, PTMU) receiving currency and merchandise inventory data; said point-of-sale computer (28) being operable by a flight attendant to record transactions with said merchandise and said currency; [claim 2] a processing computer (10; see column 3, lines 65-68) adapted to receive transactional data from

said point-of-sale computer (28, see paragraph that bridges columns 5 and 6); [claim 3] a data card (16) adapted to receive inventory data from said processing computer (10) and transferring same to said point-of-sale computer (36); [claim 4] said data card (16) comprising a currency data card (16); and a merchandise data card (16; see column 4, lines 14-51) adapted to receive data pertaining to said merchandise inventory and transferring same to said point-of-sale computer (28); [claim 5] said point-of-sale computer (28) recording currency exchange (and merchandise sales transaction data on said currency and merchandise data cards respectively for transferring same (via disk drives 20, 22, 24 on CCU 18) to said processing computer (10);

In regards to independent **claim 6**, Bertagna et al. discloses a method of controlling currency exchange and merchandise sales on a passenger flight with a service cart located in the aircraft cabin, which comprises of steps of **a**) providing a security drawer in said service cart with a locked position securing same in said service cart and an unlocked position providing access thereto (see column 2, lines 61-63); **b**) providing an inventory of currency (see column 3, lines 60-61; cash receipts); **c**) providing an inventory of merchandise in said service cart (see column 3, lines 60-61); **d**) providing a point-of-sale computer (28, PTMU); **e**) loading said point-of-sale computer with data corresponding to said currency inventory and said merchandise inventory (see column 5, lines 48-51); [claim 10] **a**) recording currency exchange and merchandise sales transactions on said point-of-sale computer in-flight (see column 9, lines 32-37); **b**) inventorying said currency and merchandise inventories post-flight (see column 10, lines 23-27); **c**) reconciling the post-flight currency and merchandise inventories with the currency and merchandise data on the point-of-sale computer (see paragraph bridging column 13-14); **d**) generating an end-of-flight report of currency and merchandise transactions during said flight

(see paragraph bridging columns 13-14); [claim 12] a) maintaining foreign currency exchange information for multiple airline flights (see column 4, lines 18-22, "download data for that particular flight"); and b) programming said point-of-sale computer with foreign currency exchange information specific to a particular flight (see column 4, lines 31-34, "currency exchange rates"); [claim 13] a) maintaining multiple foreign currency exchange rages (see column 4, lines 31-34, "currency exchange rates"); b) programming said point-of-sale computer (28) with said foreign currency exchange rates (see column 7, lines 56-59); [claim 15] a) maintaining information specific to a cash bag (see column 3, lines 60-61; cash receipts) for a particular flight; b) transferring to said currency data card data pertaining to said cash bag for transfer to said point-of-sale computer (see sentence bridging columns 4-5); [claim 16] a) providing the flight crew with currency exchange information(see column 4, lines 52-64); b) the flight crew announcing to the passengers the currency exchange rage information (inherent when an exchange is conducted); [claim 17] reconciling the end-of-flight contents of cash bags with the processing computer (see column 14, lines 3-5); [claim 18] a) conducting a physical inventory of the currency and the merchandise in the cart (see column 13, lines 37-51); b) reconciling the physical inventory with currency exchange and merchandise sales transactions recorded by said point-of-sale computer (see column 13, lines 51-54); [claim 19] providing a flight summary report identifying currency, travelers check and credit card transactions (see column 13, lines 51-54); [claim 20] a) providing transaction detail report of currency exchange transactions (see column 13, lines 55-57); b) providing a transaction detail report of merchandise sales transactions (see column 13, lines 55-57); [claim 21] said merchandise comprises dutyfree merchandise (see column 2, line 6, "duty-free items"); [claim 22] providing an over and

short report of overages and shortages with respect to said remaining currency and merchandise inventories (see column 5, lines 59-63); [claim 23] creating a transaction history file of said currency exchange and merchandise sales transactions (see column 13, lines 51-54); and [claim 24] creating an archive file from currency exchange and merchandise sales transactions (see column 13, lines 51-54).

Bertagna et al. disclose all elements set forth above but fails to expressly disclose a security drawer mounted in the service cart for storing currency.

Bachman discloses a removable security drawer assembly (14, see Figure 1) including a drawer (18) removably mounted in a sleeve (16) and having locked an unlocked positions (via locking means 52; see column 3, lines 62-65), wherein the sleeve (16) is removable only when the drawer (18) is in said unlocked position.

It would have been obvious to one of ordinary skill in the art at the time of the invention to modify Bertagna et al. with a currency security drawer taught by Bachman, because a security drawer allows a user to place items a lockable drawer which protects the items from theft.

In regards to **claim 11**, Bertagna et al. fails to expressly disclose maintaining currency exchange information for multiple airlines. Bertagna et al. states in column 2, lines 3-5, that the system is useful for "airlines". The Examiner takes *Official Notice* that it would have been obvious to maintain foreign currency exchange information for multiple airlines. It would have been obvious to one of ordinary skill in the art at the time of the invention to modify Bertagna et al. for use for multiple airlines as is well known in the art, because tracking information specific to multiple airlines will provide the service for a greater number of potential customers.

Claim Rejections - 35 USC § 103

4. Claims 7-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bertagna et al. and Bachman and further in view of U.S. Patent No. 5,367,452 (Gallery et al.).

Bertagna et al. in combination with Bachman disclose all claimed elements except expressly disclosing that pre-flight currency and merchandise inventory are based on historical data.

Gallery et al. teaches the use of historical data of product sales, cashier settlement, and inventory control (see ABSTRACT).

It would have been obvious to one of ordinary skill in the art at the time of the invention to modify Bertagna's modified device the use of historical data as taught by Gallery et al. because the use of historical data provides a calculated way of determining the inventory necessary for a flight.

5. Claim 14 is rejected under 35 U.S.C. 103(a) as being unpatentable over Bertagna et al. and Bachman and further in view of U.S. Patent No. 5,873,069 (Reuhl et al.).

Bertagna et al. in combination with Bachman disclose all claimed elements except expressly disclosing the use of employee discount information.

Ruehl et al. teaches the use of utilizing employee discount information (see 4, lines 16-17).

It would have been obvious to one of ordinary skill in the art at the time of the invention to modify Bertagna's modified device with the use of employee discount information as taught by Ruehl et al., because an employee discount provides a benefit for employees to perform their duties.

Response to Arguments

6. Applicant's arguments filed 3/14/05 have been fully considered but they are not entirely persuasive.

Applicant's arguments on pages 8-10 are moot in view of the new grounds of rejection.

As set forth in detail above, it is the Examiner's position that the new teaching reference

(Bachman) provides disclosure for the security drawer mechanism required by claims 1 and 6.

Additionally, Bachman's invention is analogous art.

Conclusion

7. The following references are cited of interest but not formally relied upon in a prior art rejection:

Pike et al. and Baldwin disclose carts with locking cash drawers.

Whorton, III discloses a cart for transporting food items and includes a locking cash drawer.
